DIVISION OF
OIL GAS & MINING

Mr. Dennis R. Downs, Executive Secretary
STATE OF UTAH
Division of Solid and Hazardous Waste
Department of Environmental Quality
Salt Lake City, UT 84114-4880

SUBJECT: Georgia-Pacific waste disposal sites

Dear Mr. Downs:

This letter is in answer to yours of October 29, 1991 to Mr. Ernst A. Borstel concerning deficiency of our solid waste disposal sites, application located in Sevier County, Utah.

Enclosed are:

- a. Two 7.5 minute USG's (color) maps showing the location of the dump sites.
- b. Two plots of all quarter in section 12 township 22 S range 1 W and section 5 township 23 S range 1W with a cover letter from Department of Natural Resources, Division of Water Rights indicates that there are no wells existing within Section 5, or Section 12.
- c. A letter of approval from the Department of Natural Resources, Division of Oil, Gas and Mining for both Western Claims and Crescent Claims landfills.
- d. Approved mining claim by Bureau of Land Management.
- e. County map indicating the location of patented Crescent Claims.
- f. A color U.S.G.'S map showing surface drainage channels.
- g. Gravel and dirt roads are colored yellow and paved roads are colored red on U.S.G.'S map.
- h. Please note enclosed U.S.G.'S map for general topography.

- I. A general description of geology of the area. Dump sites area is composed of bluish-gray calcareous shale with gray sandstone, massive gray to white gypsum beds. Shaly limestone and gypsiferous shale beds are steep which supports sparse vegetation.
- J. To close dump area we will use dozer, loader, truck and grader and haul previously pushed or shaly limestone, gypsiferous shale which are present at the dump-site and cover the dump area, use native seed to establish vegetation.
- K. Standard quarry equipment:
- D-8 Dozer
 - 988 Loader
 - G-12 Grader
 - Haul Pack Truck
- L. Fencing and controlled access
- There isn't any concern that this area will be used as a dump-site by anyone other than Georgia-Pacific, "no dumping" signs would be posted.
- At present Georgia-Pacific practice is to haul only Gypsum related waste to our dump-site, all other waste is being hauled to county land fill.
- M. Please note county map and BLM assessment approval for land ownership.
- N. At Western Claims dumping will progress north-east, at Crescent Claims dumping will progress south-east and if gypsum run-off proves to be a problem small berm will be constructed down stream to catch the sediments.
- O. Our plan is to cover and reclaim both dump areas as we progress every three years.
- P. Due to nature of our waste and sequence of our dumping, daily cover of our landfills is impractical. (please note enclosed request for variance)

If you have questions concerning the above please call Bob Shajary at 896-5406.

Sincerely,

GEORGIA-PACIFIC CORP.

Bob Shajary, PLANT MANAGER
